Apex Courts Make Legal Rules §

§ Rulemaking is a hallmark feature of apex courts.

Apex Courts Make Legal Rules §

- § Rulemaking is a hallmark feature of apex courts.
 - § Lower courts function as decentralized repositories of legal rules.

Apex Courts Make Legal Rules §

- § Rulemaking is a hallmark feature of apex courts.
- § Lower courts function as decentralized repositories of legal rules.

Quote

“The Court considers the Maltese practice of ‘golden passports’ incompatible with European Union (EU) law, thus intervening in a manifest case of abuse. This is certainly applaudable. The problem lies not with the decision’s outcome, but in the way the Court reaches it” Spieker, L. D. & Weber, F.(2025)

The European Union's Fantastical Constitution

A Response to von Bogdandy and Spieker

Somewhat counterintuitively, constitutional scholarship can be like writing fantasy novels. Within certain parameters, constitutional scholars can create their own expanded universe, proposing new constitutional realities and offering audacious suggestions for constitutional reform. But like fantasy writing, constitutional reasoning can become fantastical if the plot twists are too death-defying and the ground rules of the fantasy world broken too often. And just as fantasy fans might at that point say, "enough is enough, this is no longer true to the original story", constitutional scholars should do the same.

In recent years, Armin von Bogdandy and Luke Dimitrios Spieker have proven to be among the most creative readers of the EU constitution. Their constitutional reasoning is thought-provoking and their proposals daring. Their work is used in our academic teaching and their policy courage has been appreciated by the EU institutions ([here](#)). Yet having followed their work closely, we feel it is no longer true to the original story: the narrative is no longer convincing, and the ground rules are too often broken. In fact, it seems to us that von Bogdandy and Spieker have become trapped in their own story, trying to create a constitutional universe that by now is fantastical.

Recently, von Bogdandy and Spieker decided to boldly go where not even they had dared to go before. To overcome the possible Hungarian veto on prolonging EU sanctions against Russia, they [propose](#) that the explicit requirement in Article 31(1) TEU for such decisions to be taken by the Council acting unanimously should be overcome on the basis of Article 2 TEU. In their view, a Hungarian veto against further sanctions would violate the value of solidarity and the Hungarian vote should therefore not count. In this post, we argue that this would launch us into a whole new, and in our view, dangerous galaxy.

Overcoming Objections to Overcome the Hungarian Veto

A Rejoinder to Dawson and van den Brink

This June, [we proposed](#) ways to overcome a Hungarian veto on EU sanctions against Russia. Our proposal prompted Mark Dawson and Martijn van den Brink to write [a sharp response](#), arguing that we had ventured beyond the confines of serious legal scholarship into the realm of the fantastical. To recall, our proposal addressed a veto that threatens existential interests of the Union and breaches the solidarity enshrined in Article 2 TEU. On this basis, we advanced two independent paths to overcome Hungary's obstruction.

First, Hungary's breach of Article 2 TEU is of such severity that it affects the veto's very existence. In consequence, Hungary's vote has never been validly cast, so a Council decision can be adopted without Hungary. Second, the CFSP's unanimity rule in Article 31(1) TEU can be interpreted in light of Article 2 TEU as not covering exceptional situations that threaten the Union's peace, its values, and the well-being of its peoples, so that qualified majority applies.

Armin von Bogdandy

Armin von Bogdandy is Director at the Max-Planck-Institute for Comparative Public Law and International Law, Heidelberg, and a Professor for Public Law at the Goethe University of Frankfurt.

Luke Dimitrios Spieker

Luke Dimitrios Spieker is a Postdoctoral Researcher at DFG Research Training Group: DynamInt at Humboldt University of Berlin, a Senior Research Fellow at the Max Planck Institute for Comparative Public Law and International Law in Heidelberg and Associate Editor at *Verfassungsblog*.

What we know from theory...

- ## § Historically domestic courts as the ‘main allies’ of the ECJ in the judicial construction of Europe

What we know from theory...

- § Historically domestic courts as the ‘main allies’ of the ECJ in the judicial construction of Europe
- § EU MS courts are necessary to enforce its caselaw in cases that do not require a referral

What we know from theory...

- § Historically domestic courts as the ‘main allies’ of the ECJ in the judicial construction of Europe
- § EU MS courts are necessary to enforce its caselaw in cases that do not require a referral
- Member states observations (*amici curiae*) influence the ECJ significantly when solving case dispositions.

What we know from theory...

- § Historically domestic courts as the ‘main allies’ of the ECJ in the judicial construction of Europe
- § EU MS courts are necessary to enforce its caselaw in cases that do not require a referral
- Member states observations (*amici curiae*) influence the ECJ significantly when solving case dispositions.
- These observations construed to carry credible threat of non-compliance and/or override.

What ECJ thinks...

1

What ECJ thinks...

We have to deliver... to the satisfaction in particular of the national judges that are asking the questions. This is... our first addressee... It's not academia... but it's the judge that has asked the question, and we want that... she receives an answer that she can work with.

And then the Commission is in every proceeding, tells us, 'Well, the directive effectively intends to regulate this and that,' and so on and so forth. And of course, the Member State in question would say, 'No, no, no, this is going way too far.'

— Thomas von Danwitz, Vice President to the ECJ,
Borderlines Podcast #3, 1 Nov 2024

Research Question

Under what conditions does the European Court of Justice align its legal basis usage with domestic courts in constructing legal rules?

Referral Question with citation items

1. Do Article 49 TFEU and Article 54 TFEU require that the acquiring company is entitled to deduct in its taxation losses incurred in previous years by a company merging with it, which has resided in another Member State where it has incurred the losses in connection with business activities, when the acquiring company will not have a fixed place of business in the resident state of the acquired company and when, under national legislation, the acquiring company is entitled to deduct the losses of an acquired company, if the acquired company was Finnish or if the losses had been incurred in a fixed place of business located in this state?

1:TFEU:2008:0001:00_MAIN001_00_BDY00000:ART00049:00000000:00000000;

Measurement LIAC

Paired Judgment Paragraph with citation items

Articles 49 TFEU and 56 TFEU do not, in the circumstances of the main proceedings, preclude national legislation under which a parent company merging with a subsidiary established in another Member State, which has ceased activity, cannot deduct from its taxable income the losses incurred by that subsidiary in respect of the tax years prior to the merger, while that national legislation allows such a possibility when the merger is with a resident subsidiary. Such national legislation is none the less incompatible with European Union law if it does not allow the parent company the possibility of showing that its non-resident subsidiary has exhausted the possibilities of taking those losses into account and that there is no possibility of their being taken into account in its State of residence in respect of future tax years either by itself or by a third party
